

Principles and key features of science to policy transfer in health information – options and priorities

Anke Joas, BiPRO, Germany

Health information - Science - Policy

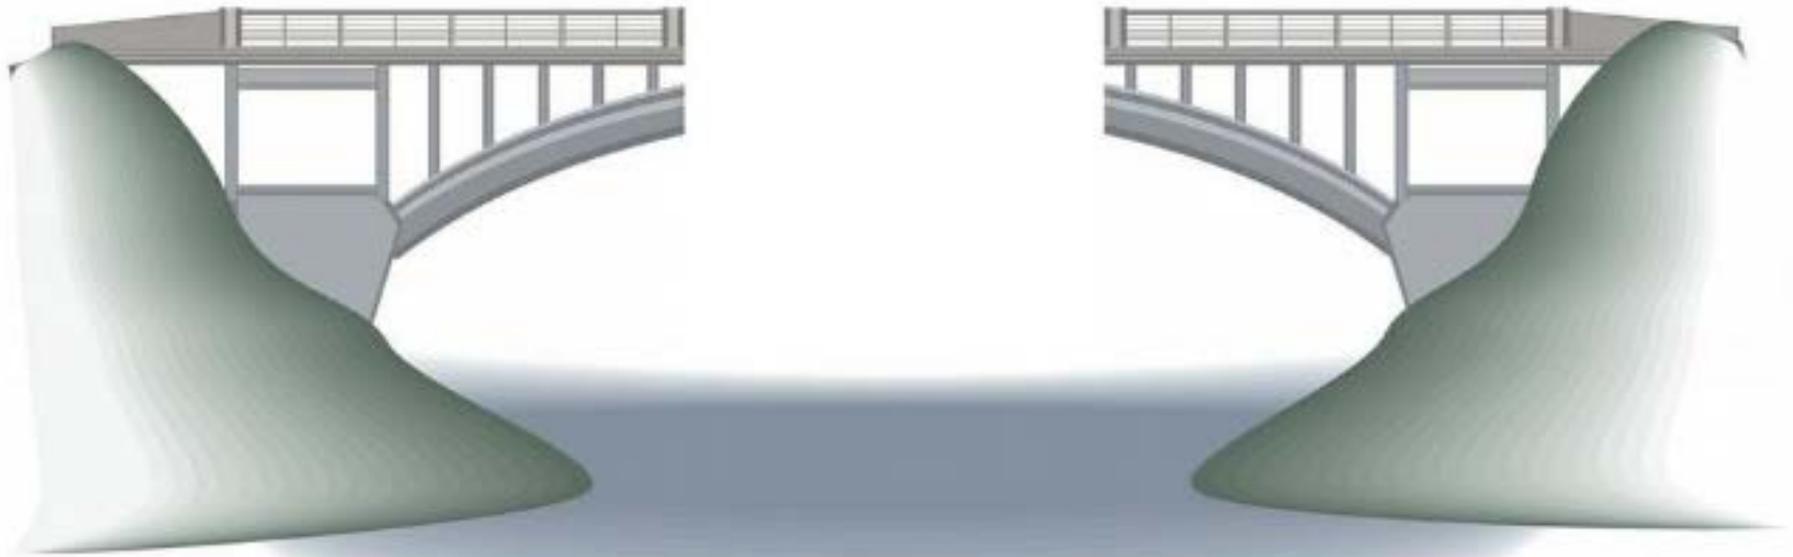

Couldn't we communicate better if we built a bridge?

Getting Your Message

A C R O S S

Options and Priorities for an HIREC ERIC

Strategic planning

- Identification of concerns/needs,
- Messaging (how can data help identification of problems and efficient solutions)
- Policy oriented data collection and research

Institutionalised exchange

- Cross sectoral: Stakeholder - data provider
- Cross-border: Regional - National – European – Global

Tool development

- Comparability, interoperability, quality assurance
- Interpretation
- Communication and dissemination

Any suggestions on how to get across?
